

SEPA Payment Gateway for WooCommerce

Seamlessly adds SEPA Direct Debit support to WooCommerce. Easily collect IBAN and BIC of your customers during checkout and export SEPA-XML-files ready for upload to your bank.

- Dynamic real-time validation of IBAN and BIC (s. video for demonstration).
- Creates XML-files that are 100% compliant to PAIN.008.003.02 standard.
- Automatic Umlaute-transformation.
- Basic fraud prevention: highlights mismatching shipping name and account holder.
- Multiple payments in one XML-file.
- See all open payments in an overview before exporting XML. Easily navigate to orders to check details.
- Supports WooCommerce Subscriptions.

Versions

- 1.6.9 Added french translation provided by Nicolas Grandgirard (thanks Nicolas! =)
- 1.6.8 Fixed error "Fatal error: Allowed memory size ..." when trying to export XML files with Subscriptions installed.
Fixed error "Notice: Undefined index remittance_info..."
- 1.6.7 Using WooCommerce order number instead of post id for remittance information.
- 1.6.6 Compatibility to WooCommerce 3.0. Added setting for remittance information.
- 1.6.5 Fixed issue with old orders that were still created with WooCommerce Subscriptions 1.x.
- 1.6.4 Fixed issue where direct debit information was empty in subscriptions created with WooCommerce Subscriptions 1.x.
- 1.6.3 Fixed issue with validating some BIC-numbers.
- 1.6.2 Support for change of payment method by customer added.
- 1.6.1 Does not export payments for cancelled orders anymore.
- 1.6 Updated to fully support WooCommerce Subscriptions 2.0 including multiple Subscriptions.
Please note: The plugin is now no longer compatible with Subscriptions 1.x!
Set due date for payment one day into the future to prevent banking software from rejecting XML-file.
- 1.5.4 Made exporting payments as COR1 express debits optional. Default is the basic or CORE debit which has a five working day delay before the payment is fulfilled. Please check with your bank before activating COR1 debits.
- 1.5.3 Convert IBAN, BIC and Creditor ID to uppercase. Some banks seem to reject the XML if it contains lower case letters in these fields.
- 1.5.2 Not released.

- 1.5.1 Removed dependency on php BC Math library, which is missing on some hosted webspaces. Remove white space from IBAN and BIC before storing them in the database.
- 1.5 Added SEPA information to the edit order page.
- 1.4.1 Fixed missing description on checkout-page.
- 1.4 Fixed issue when WooCommerce Subscriptions is not installed.
- 1.3 Fixed incompatibility with WooCommerce Stripe gateway.
- 1.2 Added hint when trying to export payments without setting up the target account information.
Setting SEPA sequence correctly to ONE_OFF, FIRST or RECURRING depending on payment type.
- 1.1 Added support for WooCommerce Subscriptions
- 1.0 Initial release

What is SEPA Direct Debit?

SEPA Direct Debit is a way to directly withdraw money from your customers account. This is convenient for your customers, because they only need to provide their account details during checkout and everything else is automatic for them. It is also a very cheap payment method for you as a shop owner because there is no third party, like a payment service involved and bank fees for SEPA direct debit are typically very low.

In order to collect SEPA direct debit withdrawals, you need a so called **Creditor ID**. In Germany, this ID is assigned by the Bundesbank (→<https://extranet.bundesbank.de/scp/>).

How does it work?

SEPA Payment Gateway for WooCommerce provides an easy way to offer SEPA Direct Debit payment to your customers in 4 simple steps:

1. Every time, one of your customers chooses SEPA Direct Debit as the payment method in an order, SEPA Payment Gateway creates a **new outstanding payment**.
2. You can now **login to the Wordpress Admin backend** and **export all outstanding payments into a single SEPA XML file**. How often you do this is completely up to you – once a day, multiple times per day, once a week – whatever rhythm suits your business best.
3. **Download the SEPA-XML file created and upload it to the online banking of your bank**. You will need a business account for this to work and some bank require you to unlock SEPA direct debit payments before this is possible. Contact your bank to find out more.
4. **Check in your online-banking that the payment has arrived**, then manually set the corresponding order to “Processing” in the WooCommerce backend.

WooCommerce Integration

SEPA Payment Gateway for WooCommerce integrates with WooCommerce and WooCommerce Subscriptions in the following ways:

1. Adds a new payment gateway that can be configured in the **WooCommerce Settings** in the admin backend (s. Installation-section below).
2. Adds a new payment method for customers to choose during **checkout** (s. Checkout-section below).
3. Adds a new **“outstanding payment” for each order** where SEPA direct debit was chosen as the payment method.
4. Adds a new **“outstanding payment” for each manual renewal or automatic renewal order** processed by WooCommerce Subscriptions.
5. Adds a new page in the WooCommerce admin backend **to export “outstanding payments” to SEPA XML files and download those files.**

Order Status/ Payment processing

The way in which order status are set differs for initial orders and renewal orders for subscriptions.

Initial orders of subscription and non-subscription products

For the initial checkout or an order that contains any number of subscription and non-subscription items, SEPA Payment Gateway for WooCommerce **reduces the item stock** (if stock management is configured) and **sets the order to “On hold”** awaiting the SEPA direct debit payment to be completed first.

<input type="checkbox"/>		Order	Purchased	Ship to		<input type="checkbox"/>	Date	Total	Actions
<input type="checkbox"/>		#162 by Admin admin@localhost.local	1 item	BL-Solutions, Gregor Testing, Meyerbeerstraße 38, 13088 Berlin	-	<input type="checkbox"/>	2015/08/30	€100.00 Via SEPA Direct Debit	

This is also shown in the order comments:

Order Notes

Item #65 stock reduced from 37 to 36.

added on August 30, 2015 at 7:13 pm [Delete](#)
[note](#)

Awaiting SEPA direct debit completion.
Order status changed from Pending
Payment to On Hold.

added on August 30, 2015 at 7:13 pm [Delete](#)
[note](#)

The order needs to be advanced **to status “Processing” manually** after you downloaded the corresponding payment inside a SEPA XML file (s. Export of SEPA XML-files below), uploaded the file to your bank and the bank has received the payment from your customer. This can be done by clicking the button marked with three dots in the order row:

<input type="checkbox"/>		#162 by Admin admin@localhost.local	1 item	BL-Solutions, Gregor Testing, Meyerbeerstraße 38, 13088 Berlin	-		2015/08/30	€100.00	Via SEPA Direct Debit	
--------------------------	--	--	--------	--	---	--	------------	---------	--------------------------	---

In case, subscription items are contained in the order, **this also automatically sets the subscription to “active”**.

WooCommerce Subscription renewal orders

For manual and automatic renewal orders created by WooCommerce Subscriptions, when a subscription is renewed, SEPA Payment Gateway for WooCommerce automatically marks the order as paid, setting the status to “Processing” immediately:

Order Notes

Item #84 stock reduced from 22 to 21.

added on August 30, 2015 at 7:46 pm
Delete note

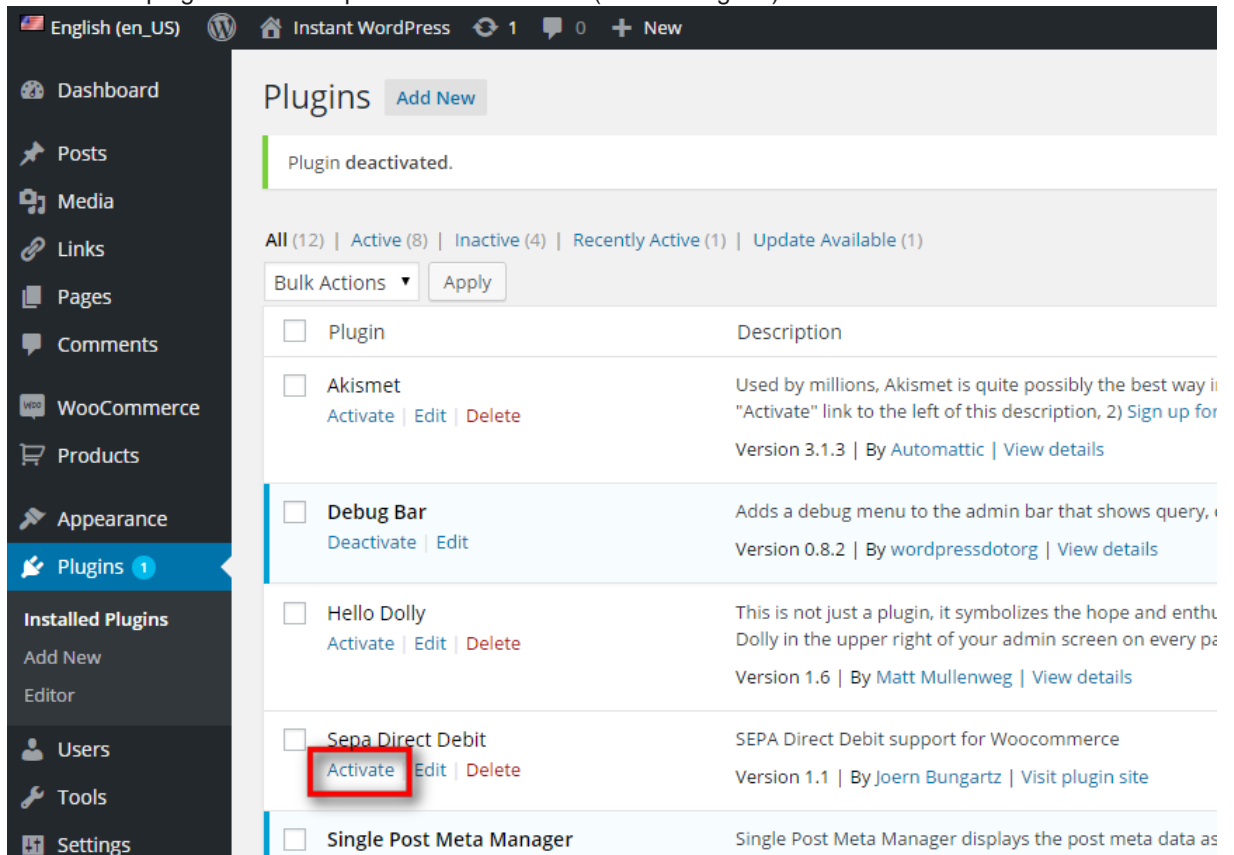

Order status changed from Pending Payment to Processing.

added on August 30, 2015 at 7:46 pm
Delete note

This behavior was chosen because setting the renewal order “On Hold” would result in the corresponding subscription to be put “On Hold” as well. Following the workflow outlined above, where the order is set to “Processing” or “Complete” after the payment has arrived, the subscription would be “On Hold” for a few days typically. While this is not a problem for physical subscriptions, it would interrupt access to digital products or memberships and would thereby annoy customers.

Installation

1. Copy all content in the folder 'sepa-direct-debit' into your wp-content/plugins folder in your wordpress installation.
2. Activate the plugin in the wordpress admin backend (Menu "Plugins"):

3. Navigate to the "WooCommerce/Settings" menu and select the "Checkout" Tab. Finally, click on the "SEPA Direct Debit" link at the top.
4. Enable the SEPA Direct Debit payment gateway by checking the "Enable SEPA Direct Debit" checkbox.

- Fill in the information of the target bank account to which SEPA direct debit payments shall be transferred:

The screenshot shows the WordPress admin dashboard with the WooCommerce settings page open. The 'Check for BIC' checkbox is checked. The 'Target account holder', 'Target IBAN', 'Target BIC', and 'Creditor ID' fields are highlighted with a red box.

SEPA Direct Debit

Enable/Disable ☒ Enable SEPA Direct Debit.

Title
This controls the title which the user sees during checkout.

Description
This controls the description which the user sees during checkout.

Ask for BIC ☒ Check this if your customers have to enter their BIC/Swift-Number. Some banks accept IBAN-only for domestic transactions.

Target account holder
The account holder of the account that shall receive the payments.

Target IBAN
The IBAN of the account that shall receive the payments.

Target BIC
The BIC of the account that shall receive the payments.

Creditor ID
The creditor ID to be used in SEPA debits.

[Save changes](#)

- You can choose to not ask your customers for the BIC in case your bank accepts domestic SEPA debits without BIC. In this case, deselect the “Ask for BIC” checkbox.
- Don't forget to save your changes by clicking “Save changes”.

Checkout

Now, during checkout, your customers can select SEPA Direct Debit as the payment method. If they do, they need to provide the name of the account holder, the IBAN and BIC (if “Ask for BIC” is selected in the settings, s. “Installation”).

Sign Up Now

In case an invalid IBAN and/ or BIC is entered, the field is highlighted and an error message shown:

The screenshot shows a payment method selection interface. At the top, there are three radio buttons: "Cheque Payment", "PayPal" (with a PayPal logo), and "SEPA Direct Debit". The "SEPA Direct Debit" option is selected. To the right of the "PayPal" option is a link that says "What is PayPal?". Below the radio buttons is a form container. Inside the container, there is a label "Account holder *" followed by a text input field containing "John Doe". Below that is a label "IBAN *" followed by a text input field containing "DE". Below the "IBAN" field is a red error message: "Please enter a valid IBAN.". Below that is a label "BIC *" followed by a text input field containing "XY". Below the "BIC" field is a red error message: "Please enter a valid BIC.". At the bottom right of the form container is a purple button that says "Sign Up Now".

In case the checkout form is submitted regardless, error messages will be shown alongside other WooCommerce messages:

The screenshot shows a list of error messages displayed in a light gray box. Each message is preceded by a red circle icon containing a white exclamation mark. The messages are: "First Name is a required field.", "Last Name is a required field.", "Account holder is a required field.", "Please enter a valid IBAN.", and "Please enter a valid BIC."

Export of SEPA XML-files

List outstanding payments

After the checkout is complete, the payment will show up in the “WooCommerce/ SEPA XML”-menu in the admin backend. Click on the Order number in the first column to navigate to the WooCommerce order view.

Export SEPA XML					
Order	Amount	Shipping Name	Account Holder	IBAN	BIC
#156	29	Gregor Testing	Gregor Testing	DE54476501307427230193	WELADE3LXXX

Export to SEPA XML

Basic fraud prevention

In case the name in the shipping address and the account holder do not match, the corresponding payment will be highlighted:

Export SEPA XML					
For some orders, name of account holder does not match name in shipping address.					
Order	Amount	Shipping Name	Account Holder	IBAN	BIC
#157	29	Gregor Testing	John Doe	DE54476501307427230193	WELADE3LXXX

Export all outstanding payments

To export all outstanding payments into a new SEPA XML-file, click the “Export to SEPA XML” button.

This will create a new SEPA XML-file. All SEPA XML-files previously created are listed below the list of outstanding payments:

Export SEPA XML

Exported 1 payments to new SEPA XML: 2015-08-27-06-15-54-SEPA-DD-156.xml

SEPA XML-Files

Please use right-click and 'save-link-as' to download the XML-files.
